Final Presentation

Your project to prepare for the final presentation can be, e.g.:

- A **deeper dive** into some topic covered in class (e.g., some extension/generalization)
- An **outlook into different fields** (e.g., drawing connection to statistical physics, combination of variational methods with deep learning, etc.)
- A **summary of a scientific paper** with own implementations
- **Explanation** of some **advanced technique** or algorithm found in the literature
- An **application** of algorithms (or their extensions) to **real-world problems** (medical imaging, astronomy, etc.)
- An **original contribution** of yours (can be *not* linked to a scientific publication)

Typically, it will be based on **published scientific paper**. All sources must be adequately cited!!!

Final Presentation

Deadlines:

- By **Thursday, Oct. 22**: Provide by e-mail
  - Your presentation **title**
  - An **abstract** of your project
  - The full reference of the paper you are basing your project on (if applicable)

  NB: In case of topic collisions I will ask for a change of topic
- **Tuesday, Nov. 10**: Send me draft of final presentation slides (please put your profile picture and name on slide 1)

Format (tentatively):

- 15 minutes per group + 5 minutes for questions
- Split the presentation time evenly among group members
